

Multimice® *New*

Uses with Educative Freeware

Heure Bis & Multimice® *New*

The software *Heure Bis* allows to learn how to tell the time.

It offers different possibilities, the teacher can choose to display the numbers or not, he can also decide if the student has to find the time and write the correct answer using the keyboard, or if the student should position the hands properly to display the time indicated.

Associated with *Multimice® New* software, this freeware allows a teacher to give hand to each student to check the capabilities of his/her class.

This play allows a better reflection and understanding from the students.

Carreaux & Multimice® *New*

The *Carreaux* software allows to revise multiplication tables.

Tiles where are inscribed numbers appear on the screen. On the right, you find a multiplication; the student must break the tile containing the result of this multiplication by clicking.

The *Multimice® New* software will allow the teacher to interrogate each student. *Carreaux* and *Multimice® New* combined mix business and pleasure for both the teacher and the students.

Espace& Multimice® *New*

Espace is an educational game developing a sense of the organization of space for students.

Two grids are displayed on the screen, where several objects are present. The aim of this game is to correctly position the object in the upper right as shown in the small grid.

Espace is a set of reproduction space.

Used with Multimice® *New*, this software allows the teacher to test the understanding of his class against this delicate exercise that is a reproduction of a picture.

*The MultiMice®*New* system allows the deployment of a mobile classroom or media room for a fraction of the cost of conventional equipment:*
