Multimice® *New*

Uses with Educative Freeware

Souriklik& Multimice® *New*

This software isan awakeningsoftwarein the way of using the mouse, it offers 4 differentfun activities.

→Learning how tomove the mouse: the studentmust passthecursor overobjectswhile avoidingothers.This section alsoallows students to developa notion ofthe size of thecursor.

→Learning how toclick: the student mustclick on different objectswhich thenset in motion.

→Learnhow to doubleclick: same as thesecondpartbutby double-clicking.

→Learning how todrag: the student mustmove foodtofeedthemonster.

With this software, Multimice®*New* can provide interaction by giving out hand to different students quickly during the activity. It also allows the teacher to check the ability to use the mouse for each student.

Seterra& Multimice® *New*

This software allows thelearningof geographyplaying withcountries, capitals, regions and flags.

A map is displayed, the name of thecity, countryorregionasked isdisplayed next to thecursor, you must thenselectthe right point.According tothe number ofmistakes you make, thebackground colorof the namechanges.

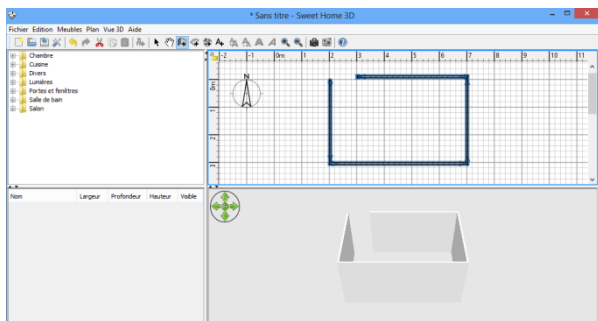

For flags, various flags will be displayed, click on the appropriate askedcountryflag.

Here Multimice®*New* will allow to interrogate students one by one and to test their knowledge.

Sweet Home 3D &

Multimice® *New*

Use in tandem with Multimice®*New*, this software allows a class to create 3D plans for a home and develop students thinking about the layout of the space and construction.

A set of tools is available including a wide range of walls, doors, windows, appliances...

The teacher can give out the hand to students expressing an idea so they can achieve it. Each student brings his/her idea and is including in the course, various suggestions are made, and a discussion is created making the lesson more dynamic. The final planwill be theresult of a collectivework.

Multimice®*New*will alloweach student toexpress an ideaand thuswill lead toa collective andinteractive work.
